

SIO 231 Geoelectromagnetism

Geomag Homework # 5,

Due March 21, 2024

The final homework for this class is for you to return to the slide decks for each lecture and briefly review the content of all 20 lectures to ensure you get a complete overview of what we were teaching. This is intended to help provide some imprint on your memory, or failing that at least a set of notes that remind you of what you once knew. Please write a **short** paragraph describing the topics and what you learned from each lecture and submit this before the end of finals week.
