

# SIO 15 LECTURE 03: THE SOLAR SYSTEM AND THE LAYERED EARTH

Leftovers from Lecture 2

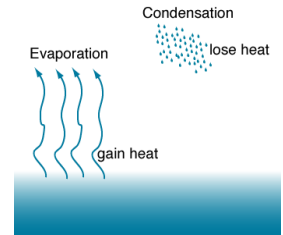

## The Concept of Latent Heat

Heat Capacity

## The 3 Phases of H<sub>2</sub>O

## Evaporation and Condensation

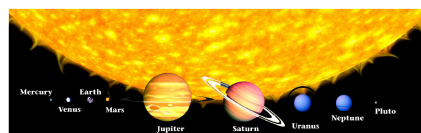

the Earth-Moon System and Observing Earth Tides, see short videos 3a and 3b  
short videos are test material

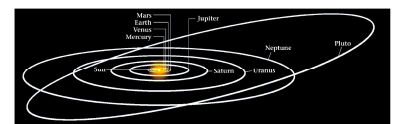

## Ages of the Universe, Sun and Earth

## Members of the Solar System

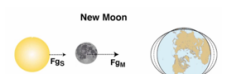

## Mass and Angular Momentum

## The Earth-Moon System; Tides

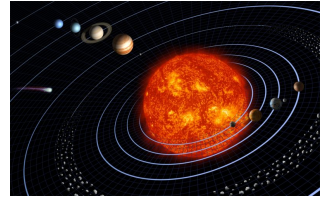

see short video 3a

## Dwarf Planets

## Asteroids and the Asteroid Belt

## Comets, Kuiper Belt, Oort Cloud

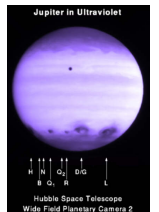

(a)
