

SIO 15 LECTURE 27: LIFE AND THE GREAT DYINGS

Leftovers from Lecture 26

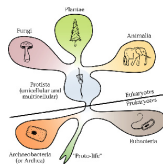

Why does Earth have Life (as we know it)?

Astronomy

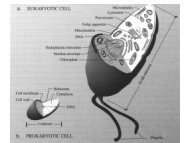

Biochemistry

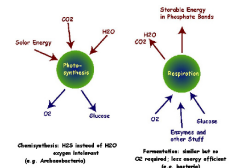

Classification of Life

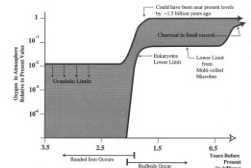

Earth's Early Life: PRIMITIV!

Photosynthesis and Respiration

Oxygen in the Atmosphere

Fossils, Evolution of Life and the Geologic Time Scale

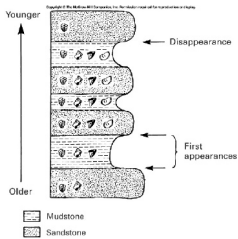

The Cambrian Explosion of Life

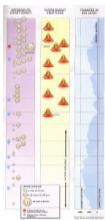

Same Examples of Earth's now extinct Life

The Five Major Mass Extinctions

Causes of Mass Extinctions

Humans and Recent (Mass) Extinctions
